-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

***Note: this is in response to amendment filed 11/30/2007. Also, A terminal disclaimer filed 08/09/2007 has been made of record.***

#### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 53, 55-64, and 66-70 are rejected under 35 U.S.C. 102(b) as being anticipated by Kalloo et al. (U.S. 6,572,629).

Note in figures 1-7 of Kalloo et al., discloses the method for reducing the volume of a stomach cavity including the steps of positioning a device (10) within the stomach cavity (36); acquiring tissue from the interior of the stomach cavity (36) with the device (10); forming a pouch by securing a fastener the acquired tissue within the stomach cavity (36) in which separate from the main volume, and wherein the pouch adapted to received food from the esophagus.

#### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 54, 65, and 71-74 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kalloo et al. (U.S. 5,355,897).

Kalloo et al disclosed the claimed invention as stated above except for the pouch having a volume less than about 30 cc. However, forming a pouch having such a volume is considered obvious to one having ordinary skill in the art because such a pouch volume would likely allow an obese person to overcome morbid obesity by allowing the person to feel full and therefore, refrain from eating more.

***Response to Arguments***

5. Applicant's arguments filed 10/30/2007 have been fully considered but they are not persuasive. Applicant's arguments with respect to claims 53, 64, and 71 have been considered but are moot in view of the new ground(s) of rejection.
